PROFESSIONAL SUMMARY

Senior .NET Developer with **5+ years** of experience designing, developing, and maintaining **enterprise applications** on **C#, .NET 8 / ASP.NET Core, ASP.NET MVC 5, and RESTful Web APIs**, backed by **SQL Server** data models, **Entity Framework Core, LINQ**, and tuned T-SQL. Builds **data integration** workloads — two-way **SAP Business One** synchronization services, Excel bulk-data ingestion with row-level validation, and scheduled **Hangfire** jobs with retry and monitoring — for procurement, inventory, and supply chain platforms handling high daily transaction volumes. Implements **secure authentication and authorization** with JWT, ASP.NET Identity, and role-based access control, and owns **release management** — EF Core migrations, schema and data migration scripts with rollbacks, and IIS deployments in planned off-peak windows. Works as **Technical Lead** in an **Agile/Scrum** team using **Azure DevOps and Git**, applying **OOP, SOLID principles, and design patterns** in design discussions and code reviews, and using **AI tools** such as Claude Code and ChatGPT for faster delivery. Currently upskilling on **Microsoft Azure** (App Services, Functions, Azure SQL, Key Vault) and CI/CD pipelines.

TECHNICAL SKILLS

Backend: C#, .NET 8 / ASP.NET Core 8, ASP.NET MVC 5, .NET Framework 4.8, RESTful Web APIs, Entity Framework Core 8, Entity Framework 6, LINQ, ADO.NET, Dependency Injection, OOP, SOLID, Design Patterns, Swagger / OpenAPI, Postman, Hangfire

Database & Data Modelling: SQL Server, T-SQL, Schema & Data Model Design, Stored Procedures, Views, Triggers, Query Optimization, Indexing, EF Core Code-First Migrations, Schema & Data Migration Scripts, Rollback Scripts, Backup & Restore, Environment Refresh with Data Masking & Validation

Data Integration: SAP Business One Integration (two-way sync), Scheduled & Background Jobs (Hangfire), Excel Bulk Data Ingestion with Row-Level Validation, REST / JSON Integration, SMTP Services, Reporting with Server-Side Paging & Filtering, Crystal Reports, DevExpress Reporting

Security & Auth: OWASP Top 10, JWT Authentication, ASP.NET Identity, Role-Based Access Control (RBAC), XSS / CSRF Prevention, Parameterized Queries, SSL / TLS

DevOps & Tooling: Git, Azure DevOps, TFS, IIS Hosting & Administration, Windows Server, Release & Deployment Management, ELMAH, log4net, Production Logging & Troubleshooting

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap 5, TypeScript, jQuery, AJAX, ASP.NET MVC Razor Views, DevExtreme, Responsive Web Design

Practices & AI: Agile / Scrum, Sprint Planning, Estimation, Code Reviews, Clean Code, Requirement Analysis, Mentoring, Claude Code, ChatGPT, AI-Assisted Development

Currently Upskilling: Microsoft Azure (App Services, Functions, Azure SQL, Storage, Key Vault), Azure Pipelines CI/CD, Docker

PROFESSIONAL EXPERIENCE

Senior .NET Full Stack Developer & Technical Lead

Apr 2023 – Present

Spark IT Tech — Tiruppur, Tamil Nadu

- Design, develop, and maintain **enterprise web applications** end to end on **C#, .NET 8 / ASP.NET Core, ASP.NET MVC 5, and RESTful Web APIs**, applying OOP, SOLID principles, and design patterns.
- Design and secure **RESTful .NET APIs** — JWT-secured, versioned endpoints documented in **Swagger / OpenAPI**, with consistent validation and error handling — consumed by React and jQuery front ends.
- Design **SQL Server schemas and data models** and tune **T-SQL stored procedures and indexes** for high-volume transactional and reporting modules.
- Implement **authentication and authorization** with JWT, ASP.NET Identity, and **role-based access control** so vendors, buyers, and approvers see only their permitted screens and data.
- Support releases with **EF Core migrations**, data and rollback scripts, and Production → UAT / Dev refreshes using **data masking and validation** of sensitive fields.
- Deploy IIS releases in **scheduled off-peak windows with pre-tested rollback scripts** and post-deployment validation; monitor and troubleshoot production issues with ELMAH and log4net logs.
- Resolved **500+ security issues/findings** related to **XSS, SQL Injection, and CSRF** on a live production system without business downtime.
- Act as **Technical Lead** in an **Agile/Scrum** team — task breakdown, estimation, design discussions, **code reviews**, and mentoring juniors on .NET and secure coding — working with QA, UAT, and business stakeholders.
- Develop the **React.js** front end for the Vendor Portal — reusable form, grid, and modal components integrated with the .NET APIs.
- Use **Claude Code and ChatGPT** for AI-assisted development and code review across the team.

.NET Full Stack Developer

Aug 2021 – Mar 2023

Spark IT Tech — Tiruppur, Tamil Nadu

- Developed procurement and inventory modules on **C#, ASP.NET Core, and ASP.NET MVC 5** for high-volume daily transactions.
- Built **RESTful Web APIs** secured with JWT authentication, versioning, and Swagger documentation.
- Built two-way **SAP Business One data synchronization** on **Hangfire** background jobs — retry, failure alerts, and monitoring for long-running data exchange.

- Created **Excel bulk-upload data ingestion** modules with row-level validation and SAP sync logic.
- Tuned **T-SQL stored procedures and indexes** to bring high-traffic screens to sub-second response times.
- Ran database migration and patch scripts for each release along with matching rollback scripts.
- Built frontend screens with **JavaScript, jQuery, and Bootstrap**, using AJAX to load and submit data without page reloads.

KEY PROJECTS

Enterprise Supply Chain & Procurement System | Technical Lead

C#, ASP.NET Core, ASP.NET MVC 5, RESTful Web APIs, Entity Framework, LINQ, SQL Server, JavaScript, jQuery, Bootstrap, JWT, IIS

- Built a multi-module **enterprise application** for procurement, inventory, and supply chain operations on .NET Core and ASP.NET MVC.
- Designed the **RESTful Web API** layer with JWT authentication, versioning, and Swagger documentation.
- Designed the **SQL Server data model** and tuned stored procedures and indexes for high-volume transactional screens.
- Led the module as **Technical Lead** — task breakdown, design discussions, estimation, and code reviews.

SAP Synchronization Services — Data Integration | Backend / Integration Developer

C#, ASP.NET Core, RESTful Web APIs, Hangfire, SAP Business One, SQL Server

- Built **SAP Business One data integration** services from scratch on **Hangfire** for near real-time, two-way data exchange with the SQL Server application database.
- Automated two-way data flow, removing manual reconciliation between teams.
- Added retry, failure alerts, and monitoring so failed jobs recover automatically.

Smart Documents — Invoice & Document Management | Full Stack Developer

C#, ASP.NET MVC 5, RESTful Web APIs, Entity Framework 6, ADO.NET, SQL Server, ASP.NET Identity, DevExtreme, JavaScript, jQuery

- Built a configurable document engine so new document types can be added without code changes.
- Delivered **SAP Business One integration** for invoice and vendor master data.
- Fixed 65 **code review** issues across 37+ files and reduced database round-trips by around 50%.

Database Migration & Release Management | Release / Deployment Engineer

SQL Server, T-SQL, EF Core Migrations, IIS, Windows Server, Azure DevOps, Git

- Handle **EF Core migrations**, schema and data migration scripts with matching rollback scripts, and Production → UAT / Dev refreshes with **data masking and validation**.
- Manage IIS hosting and SSL setup, and deploy releases in scheduled off-peak windows with pre-tested rollback and post-deployment validation.

Vendor Portal | Full Stack Developer (React + .NET)

C#, ASP.NET Core, RESTful Web APIs, Entity Framework Core, SQL Server, ASP.NET Identity, JWT, React.js, JavaScript (ES6+), Bootstrap

- Built the .NET API layer and **React.js** vendor-facing UI — a reusable component set (forms, grids, modals, validation) for registration, onboarding, and approval screens.
- Integrated the front end with **RESTful .NET APIs** using JWT authentication and role-based routing for vendors, buyers, and approvers.
- Delivered reporting screens for purchase orders, invoices, and vendor activity with server-side paging and filtering for large data sets.

KEY ACHIEVEMENTS

- Resolved **500+ security issues/findings** related to XSS, SQL Injection, and CSRF on a live enterprise platform, aligning it with **OWASP Top 10**.
- Achieved **sub-second response times** on high-volume modules through T-SQL and index tuning.
- Built two-way **SAP Business One data integration** from scratch, removing repeated manual reconciliation work.
- Reduced database round-trips by around **50%** on the document management module through query and data-access refactoring.
- Delivered production releases in planned windows with pre-tested rollback scripts, **meeting agreed SLA commitments**.
- Delivered the **Vendor Portal** APIs and React.js front end, replacing email-driven vendor follow-ups with a self-service portal used by suppliers, buyers, and approvers.

EDUCATION

Bachelor of Engineering (B.E.) — Electrical & Electronics Engineering

2016 – 2020

Karpagam College of Engineering — CGPA: 7.5 / 10

Languages: Tamil (Native / Bilingual) | English (Professional Working Proficiency)
